UNCLE ED’S 001 — ONE OF ONE

FINAL TAILORING / MASTER PATTERN SPECIFICATION

By Edris Nazparvar • 2026

Purpose. Controlled drafting specification for the final 001 tuxedo. Finished measurements are garment targets; drafting allowances are added outside them. The master must be drafted through a professional bespoke block rather than by scaling a rectangle or polygon.

Supersession. This final 001 specification replaces the earlier 11.4 cm lapel and trouser-side-stripe draft: lapel is 12 cm, outer edge straight, and the trouser has no satin stripe.

1. BODY & FINISHED DIMENSIONS

Measure	Body	Finished / drafting target
Height	180 cm	Fit at actual height
Chest	105 cm	112–114 cm
Waist	101 cm	106–108 cm
Seat	112 cm	116–118 cm
Shoulder	46 cm	47–48 cm
Neck	45 cm	Draft, then verify collar
Across chest	49 cm	Front balance reference
Across back	54 cm	Back balance reference
Armhole	56 cm	High, controlled armhole
Bicep	35 cm	Full functional sleeve
Shoulder→elbow	40 cm	Sleeve pitch reference
Shoulder→wrist	70 cm	Initial sleeve length reference
Elbow	35 cm	Articulated sleeve
Thigh	60 cm	64–66 cm finished
Knee	47 cm	45–46 cm finished
Calf	43 cm	Preserve movement
Ankle	26 cm	Shoe-dependent opening
Front rise	38 cm	Final
Back rise	40 cm	Final
Outseam	100 cm	Final reference
Inseam	70 cm	Set with shoe

2. JACKET MASTER SPECIFICATION

Area	Final 001 construction
Silhouette	Structured boxy Hollywood fit; full chest; controlled waist; long clean body; controlled mass.
Front	Crossover single-button architecture; one functional closure; controlled overlap.
Button	25–28 mm aged-silver house logo; slightly low/moderate stance.
Length	78–80 cm finished; exact hem established during balance fitting.
Shoulder	47–48 cm finished; slight extension, natural rather than military.
Armhole	High armhole, clean scye; enough mobility without a low oversized opening.
Chest / waist / seat	112–114 / 106–108 / 116–118 cm finished.
Vents	Double vents, 26–28 cm.
Pockets	Jetted/clean; restrained breast welt; no external utility.
Construction	Full canvas; shaped chest; hand-padded lapel; reinforced stress points.
Sleeve	Two-piece; full bicep; articulated elbow; natural pitch; 4 functional cuff buttons.
Shirt cuff	1.5–2 cm visible.
Lapel	12 cm peak; high controlled gorge; elongated peak; completely straight outer edge.
Facing	Black satin/grosgrain, controlled sheen, full facing.
Collar	Black satin; clean transition into lapel.
Exterior rule	No shoulder boards, straps, tactical webbing, military insignia, decorative utility or uniform cues.

Pattern pieces: left front, right front, side body, back, upper sleeve, under sleeve, collar, lapel/facing, pocket welts/bags, vent reinforcement and canvas/interlining pieces. Mark grain, balance marks, notches, pocket levels, button position, roll line, break line, lapel peak and all cut quantities.

3. TROUSER MASTER SPECIFICATION

Area	Final 001 specification
Rise	Front 38 cm / back 40 cm; high natural waist.
Waistband	4.5 cm finished; 5 cm absolute maximum.
Closure	Concealed hook-and-bar; side adjusters; no belt loops.
Front	Flat front; clean crease.
Seat	116–119 cm finished starting target.
Thigh	64–66 cm finished.
Knee	45–46 cm finished.
Calf / ankle	Use 43 / 26 cm body references; draft movement allowance and set opening with shoe.
Length	100 cm outseam reference; final hem with tuxedo shoe.
Break	Minimal controlled slight break; no pooling.
Stripe	NONE — earlier draft superseded.
Pockets	Clean side pockets and rear welt pockets.

4. SHIRT / ACCESSORIES

White fine formal cotton shirt • formal collar • French cuffs • aged-silver studs • large black butterfly bow tie proportioned deliberately to the 12 cm lapel • clean black formal shoe.

5. INTERIOR / MATERIAL

Deepest black wool, approximately 280–320 g/m², low-to-medium controlled sheen, excellent drape and sufficient structure. Black/deep-forest cupro/Bemberg lining with restrained oxblood hidden accents. Label: UNCLE ED'S / By Edris Nazparvar / 001 / ONE OF ONE / 2026.

6. DRAFTING CONTROL

Add seam allowances outside finished dimensions. Keep generous toile allowances at shoulder, side body, center back, collar, sleeve and trouser seat/rise. Mark grainlines, notches, balance points, darts, pocket positions, button position, lapel roll/break, vent ends and cut quantities. Every piece must read: UNCLE ED'S 001 / piece name / cut quantity / grainline / seam allowance.

7. FITTING ORDER

Correct in this order: front/back balance → shoulder slope → collar/neck → chest → lapel roll → waist/side body → sleeve pitch → sleeve length → trouser rise/seat → thigh/knee/taper → hem/break. Never waist-suppress before balance is correct.

8. STATUS

FINAL DESIGN SPECIFICATION / BESPOKE MASTER DRAFT. This is the correct production brief and measurement control sheet. A physical toile is still required before cutting the final cloth because posture, shoulder slope, arm pitch and left/right asymmetry cannot be inferred reliably from circumference measurements alone.
