UNCLE ED'S 001
ONE OF ONE — THE LEGACY TUXEDO

HOUSE IDEOLOGY · FIT · DESIGN · DRAFTING · CUTTING · CONSTRUCTION

This packet consolidates the design and measurement material retrieved from the user's prior tuxedo drafting work and aligns it with the UNCLE ED'S house philosophy.

Pattern status: The pattern sheets in this packet are a **drafting prototype for toile development**. They are not a substitute for the tailor's final block correction. Do not cut final 280–320 gsm wool until a toile is fitted and corrections are transferred.

HOUSE LAW

• The body is nature. The mind is civilization.

• UNCLE ED'S does not decorate the body; it civilizes natural form through proportion, construction, material and craft.

• Death completes the circle: the garment should feel capable of becoming an heirloom, an object that outlives its maker.

• The outside creates intrigue. The inside rewards curiosity.

• Nothing looks accidental. Exterior luxury; internal engineering.

• Cultural path: Mazandaran / Caspian nature → Tehran modernity → Paris → Rome → Los Angeles → New York. Influences are translated into proportion, geometry, material and construction—not pasted motifs.

001 GARMENT IDENTITY

• UNCLE ED'S 001 — ONE OF ONE — 2026.

• Structured Boxy Hollywood fit: controlled mass, full chest, natural architectural shoulder, controlled waist, long clean line; never sloppy oversized.

• Psychological target: composed, intelligent, cultivated, mysterious, subtly dangerous; never costume-like.

• Visible language: refined eveningwear. Hidden language: engineered tailoring.

JACKET

• Crossover single-button architecture; one functional aged-silver house-logo button, 25–28 mm.

• Peak lapel, exactly 12.0 cm finished width; high gorge; elongated sharp peak; completely straight outer edge; no bowed/scooped line.

• Black satin facing, controlled sheen. White formal shirt and large black satin butterfly bow tie.

• Natural but architectural shoulder; high armhole; full canvas; hand-shaped chest; hand-padded lapel; precise sleeve pitch.

• Long double vents; clean jetted exterior pockets; concealed internal phone/passport/wallet/valuables/repair compartments.

• Four functional aged-silver sleeve buttons; 1.5–2 cm shirt cuff visible.

TROUSERS

• High-rise flat front; 4.5 cm finished waistband target, 5 cm maximum.

• Side adjusters, no belt loops; concealed hook-and-bar; jetted back pockets.

• Fuller thigh, controlled taper, minimal break; no visible satin side stripe in the definitive 001 design.

• Front rise 38 cm and back rise 40 cm are the later, more specific supplied values; verify on body/toile.

MATERIAL / INTERIOR

• Deepest black wool, approx. 280–320 g/m², low-to-medium controlled sheen, enough structure for architecture; subtle green depth only if it reads black.

• Black/deep forest cupro/Bemberg lining with Persian geometric logic, Art Deco geometry, organic branching/circular pathways and subtle asymmetry.

• Hidden oxblood accents. Aged-silver hardware. No military insignia, shoulder boards, tactical straps or historical uniform symbols.

• Label: UNCLE ED'S / By Edris Nazparvar / 001 / ONE OF ONE / 2026. Hidden inscriptions: THE BODY IS NATURE. / THE MIND IS CIVILIZATION. / DEATH COMPLETES THE CIRCLE.

CONSOLIDATED MEASUREMENT REGISTER

Measurement	Value	Status
Height	180 cm (range discussed 180–185)	confirm at fitting
Weight	91 kg in original sheet; later range 80–90 kg	confirm current
Chest	105 cm	supplied
Waist	101 cm	supplied
Seat / hips	112 cm	supplied
Shoulder width	46 cm	supplied
Neck	45 cm	supplied
Biceps	35 cm	supplied
Thigh	60 cm	supplied
Inseam	70 cm	supplied
Across chest	49 cm	supplied
Across back	54 cm	supplied
Shoulder → neck	18 cm	supplied
Armhole	56 cm	supplied
Waist → floor	105 cm	supplied
Jacket length reference	73 cm	supplied
Shoulder → wrist	70 cm	supplied
Shoulder → elbow	40 cm	supplied
Elbow	35 cm	supplied
Knee	47 cm	supplied
Front rise	38 cm	later specific value
Back rise	40 cm	later specific value
Calf	43 cm	supplied
Ankle	26 cm	supplied
Outseam	100 cm	supplied

RECONCILIATION NOTES

• The earlier drafting sheet recorded a 35 cm body rise and trouser targets of 103–105 waist, 116–119 seat, 64–66 thigh, 45–46 knee and 40–42 leg opening. The later 001 packet supersedes the rise with front 38 / back 40 and supersedes the decorative satin side stripe with no side stripe. Finished targets should be corrected during toile fitting.

• The earlier sheet proposed 11.4 cm (4.5 in) lapels. The definitive 001 design later increased this to 12.0 cm. Use 12.0 cm.

• The earlier sheet proposed 78–80 cm jacket length. The 73 cm figure is retained as a supplied reference, but final 001 length should be selected during toile fitting for the long, clean silhouette.

DRAFTING FORMULAS & FINISHED TARGETS

JACKET FINISHED TARGETS — STARTING BLOCK

• Finished chest: 112–114 cm (105 body + approximately 7–9 cm ease).

• Finished waist: 106–108 cm (101 body + approximately 5–7 cm ease; do not cinch).

• Finished seat/hem: 116–118 cm (112 body + approximately 4–6 cm ease).

• Finished shoulder: 47–48 cm (46 body shoulder with controlled extension).

• Initial finished jacket length: 78–80 cm is the preferred long modern target from the earlier drafting sheet; verify against the supplied 73 cm reference and body proportions during toile.

• Sleeve: draft from shoulder→wrist 70 cm, shoulder→elbow 40 cm and elbow 35 cm; final cuff position must show 1.5–2 cm shirt cuff.

• Double vent length: approximately 26–28 cm starting point, then fit.

PATTERN PIECES

• J01/J02 left and right front shells; J03 side body; J04 back; J05/J06 upper and under sleeves; J07 collar; J08/J09 facings/lapels; J10/J11 pocket welts; J12 vent reinforcement; J13 lining; J14 chest canvas; J15 shoulder reinforcement; J16 sleeve head; J17 stress reinforcements.

• Every piece: name, number, cut quantity, grainline, notches, balance marks, seam allowance, hem allowance, fold line, pocket/button location and material ID.

• Pattern sheet calibration: 100 × 100 mm square must measure exactly 100 × 100 mm after printing. Print at 100% / actual size; never 'fit to page'.

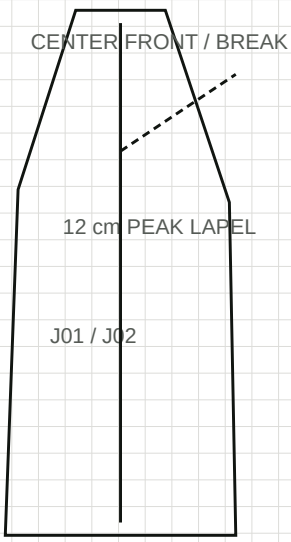
JACKET PATTERN — 1:1 DRAFTING PROTOTYPE SHEETS

The following outlines are scaled from the consolidated measurements and finished targets. They are intended as the tailor's drafting starting geometry; add seam allowances only after fitting the toile.

J01/J02 FRONT SHELL — DRAFTING PROTOTYPE

Derived from 105 chest / 101 waist / 112 seat · finished chest target 112–114 · crossover front

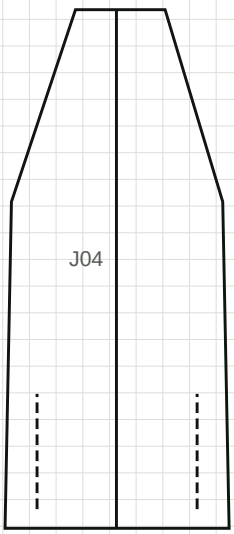
100 mm calibration square — print at 100%

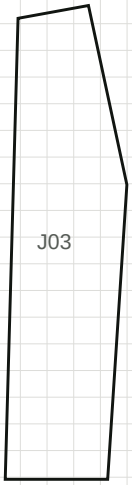


J04 BACK + J03 SIDE BODY

Structured boxy Hollywood block · high armhole · long double vent

100 mm calibration square — print at 100%



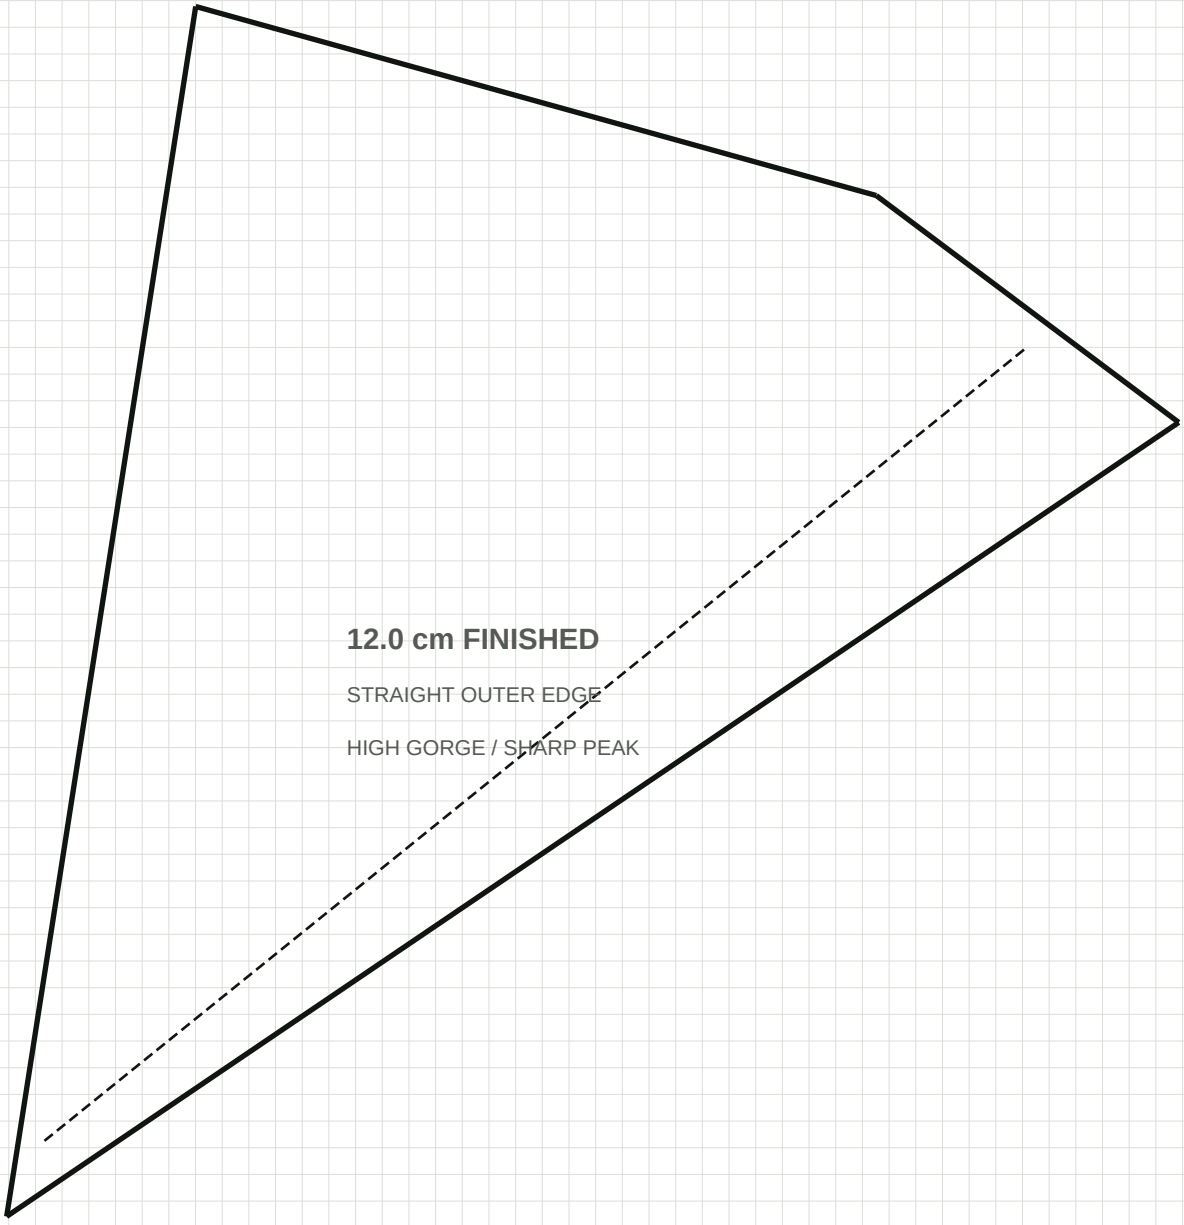


J05/J06 TWO-PIECE SLEEVE

Shoulder→elbow 40 cm · elbow 35 cm · shoulder→wrist 70 cm · articulate elbow

100 mm calibration square — print at 100%

J08/J09 LAPEL + FACING GEOMETRY

Definitive 001 law: 12.0 cm finished width · high gorge · sharp peak · straight outer edge


100 mm calibration square — print at 100%
